■ EllipticPi

`EllipticPi[`n`, `m`]` gives the complete elliptic integral of the third kind $\Pi(n|m)$.

`EllipticPi[`n`, `*phi*`, `m`]` gives the incomplete elliptic integral $\Pi(n;\phi|m)$.

Mathematical function (see Section **??**). ■ $\Pi(n;\phi|m) = \int_0^{\phi} (1 - n\sin^2(\theta))^{-1} [1 - \sin^2(\alpha)\sin^2(\theta)]^{-\frac{1}{2}} \, d\theta$. ■ $\Pi(n|m) = \Pi(n;\frac{\pi}{2}|m)$. ■ See page 374.
