

■ B.3 Some General Notations and Conventions

■ B.3.1 Function Names

The names of built-in functions follow some general guidelines.

- The name consists of complete English words, or standard mathematical abbreviations.
- The first letter of each word is capitalized.
- Functions whose names end with **Q** usually “ask a question”, and return either **True** or **False**.
- Mathematical functions that are named after people usually have names in *Mathematica* of the form *PersonSymbol*.
