

■ AppendTo

`AppendTo[s, elem]` appends *elem* to the value of *s*, and resets *s* to the result.

`AppendTo[s, elem]` is equivalent to `s = Append[s, elem]`. ■ `AppendTo[s, elem]` does not evaluate *s*. ■ You can use `AppendTo` repeatedly to build up a list. ■ See page 257. ■ See also: `PrependTo`.
