

■ EllipticLog

`EllipticLog[{x, y}, {a, b}]` gives the generalized logarithm associated with the elliptic curve $y^2 = x^3 + ax^2 + bx$.

`EllipticLog[{x, y}, {a, b}]` is defined as the value of the integral $\int_{\infty}^x (t^3 + at^2 + bt)^{-\frac{1}{2}} dt$, where the sign of the square root is specified by giving the value of y such that $y = \sqrt{x^3 + ax^2 + bx}$. ■ `EllipticLog` is the basis for all elliptic integrals in *Mathematica*. ■ See page 374. ■ See also: `EllipticExp`.
