

■ EulerE

`EulerE[n]` gives the Euler number E_n .

`EulerE[n, x]` gives the Euler polynomial $E_n(x)$.

Mathematical function (see Section ??). ■ The Euler polynomials satisfy the generating function relation

$\frac{2e^{-xt}}{e^t+1} = \sum_{n=0}^{\infty} E_n(x) \frac{t^n}{n!}$. ■ The Euler numbers are given by $E_n = 2^n E_n(\frac{1}{2})$. ■ See page 350.
