

## ■ Accumulate

`Accumulate[f, g[e1, e2, ...]]` gives  $g[e_1, f[e_1, e_2], f[f[e_1, e_2], e_3], \dots]$ .

`Accumulate[Plus, {e1, e2, ...}]` gives cumulative sums of elements in a list. ■ When you use `Accumulate` on a list of length  $n$ , you get a list of length  $n$ . ■ `Accumulate` is a generalized “prefix operation”. ■ See page 182. ■ See also: `Apply`, `Nest`, `NestList`, `Partition`.
