

■ Greater

$x > y$ yields `True` if x is determined to be greater than y .

$x_1 > x_2 > x_3$ yields `True` if the x_i form a strictly decreasing sequence.

`Greater` gives `True` or `False` when its arguments are real numbers. ■ `Greater` does some simplification when its arguments are not numbers. ■ See page 72. ■ See also: `Less`, `Positive`.
