

■ GreaterEqual

$x \geq y$ yields `True` if x is determined to be greater than or equal to y .

$x_1 \geq x_2 \geq x_3$ yields `True` if the x_i form a non-increasing sequence.

`GreaterEqual` gives `True` or `False` when its arguments are real numbers. ■ `GreaterEqual` does some simplification when its arguments are not numbers. ■ See page 72.
