

■ LerchPhi

`LerchPhi[z, s, a]` gives the Lerch transcendent $\Phi(z, s, a)$.

Mathematical function (see Section ??). ■ $\Phi(z, s, a) = \sum_{k=0}^{\infty} \frac{z^k}{(a+k)^s}$, where any term with $k+a=0$ is excluded.

■ `LerchPhi[z, s, a, DoublyInfinite->True]` gives the sum $\sum_{k=-\infty}^{\infty} \frac{z^k}{(a+k)^s}$. ■ `LerchPhi` is a generalization of `Zeta` and `PolyLog`. ■ See page 364.
