

■ Multinomial

`Multinomial`[$n_1, n_2, \dots$] gives the multinomial coefficient $\frac{(n_1+n_2+\dots)!}{n_1!n_2!\dots}$.

Integer mathematical function (see Section ??). ■ The multinomial coefficient `Multinomial`[$n_1, n_2, \dots$], denoted $(N; n_1, n_2, \dots, n_m)$, gives the number of ways of partitioning N distinct objects into m sets, each of size n_i (with $N = \sum_{i=1}^m n_i$).

■ See page 350. ■ See also: `Binomial`.
