

■ NestList

`NestList[f, expr, n]` gives a list of the results of applying f to $expr$ 0 through n times.

Example: `NestList[f, x, 3]` $\longrightarrow$ `{x, f[x], f[f[x]], f[f[f[x]]]}`. ■ `NestList[f, expr, n]` gives a list of length $n + 1$. ■ See page 182. ■ See also: `Accumulate`.
