

## ■ 0

$0[x]^n$  represents a term of order  $x^n$ .

$0[x]^n$  is generated to represent omitted higher-order terms in power series.

$0[x, x_0]^n$  represents a term of order  $(x - x_0)^n$ .

`Normal` can be used to truncate power series, and remove 0 terms. ■ See page 430. ■ See also: `Series`, `SeriesData`.
