

■ Out

`%n` or `Out[n]` is a global object that is assigned to be the value produced on the n^{th} output line.

`%` gives the last result generated.

`%%` gives the result before last. `%%...%` (k times) gives the k^{th} previous result.

`Out[ ]` is equivalent to `%`. ■ `Out[-k]` is equivalent to `%%...%` (k times). ■ See page 577. ■ See also: `In`, `$Line`.
