

## ■ BesselK

`BesselK[n, z]` gives the modified Bessel function of the second kind  $K_n(z)$ .

Mathematical function (see Section ??). ■  $K_n(z)$  satisfies the differential equation  $z^2 \frac{d^2 y}{dz^2} + z \frac{dy}{dz} - (z^2 + n^2)y = 0$ . ■ See page 363.
