

■ `ResetMedium`

`ResetMedium["file", options]` resets the options associated with a file that is already open.

`ResetMedium[options]` resets the options for the standard output.

See the notes on `OpenAppend` for the possible options. ■ `ResetMedium[PageWidth -> n]` resets the standard output to have a width of *n*. ■ `ResetMedium` can be used with pipes as well as files. ■ See pages 292 and 587. ■ See also: `Close`.
