

■ CellArray

`CellArray[{{ $a_{11}$ ,  $a_{12}$ , ...}, ...}]` is a two-dimensional graphics primitive which generates an array of rectangular gray cells.

The full form is `CellArray[array, {{ $x_{min}$ ,  $y_{min}$ }, { $x_{max}$ ,  $y_{max}$ }}, { $z_{min}$ ,  $z_{max}$ }]`. The default value of { z_{min} , z_{max} } is {0, 1}. The displayed cells fill the rectangle {{ x_{min} , y_{min} }, { x_{max} , y_{max} }}.

The array of cell values must be rectangular. ■ The cell values must be numbers between z_{min} and z_{max} . ■ Notice the order of x and y limits. Scaled coordinates can be used. ■ See page 142. ■ See also: `GrayLevel`.
