

■ Complex

`Complex` is the head used for complex numbers.

You can enter a complex number in the form $x + I y$. ■ `_Complex` can be used to stand for a complex number in a pattern. ■ You have to use `Re` and `Im` to extract parts of `Complex` numbers. ■ Only the real part is printed in complex numbers of the form $x + 0. I$. ■ See page 325. ■ See also: `Real`, `Re`, `Im`.
