

■ ContourGraphics

`ContourGraphics[array]` is a representation of a contour plot.

`ContourGraphics` can be displayed using `Show`. ■ The following options can be given:

<code>AspectRatio</code>	<code>1</code>	ratio of height to width
<code>Axes</code>	<code>Automatic</code>	whether to include axes
<code>AxesLabel</code>	<code>None</code>	axes labels
<code>ContourLevels</code>	<code>10</code>	number of contour levels
<code>ContourSpacing</code>	<code>Automatic</code>	spacing in z between contour levels
<code>DisplayFunction</code>	<code>\$DisplayFunction</code>	function for generating output
<code>Framed</code>	<code>True</code>	whether to draw a frame
<code>PlotColor</code>	<code>True</code>	whether to plot in color
<code>PlotLabel</code>	<code>None</code>	a label for the plot
<code>PlotRange</code>	<code>Automatic</code>	range of z values to include
<code>Ticks</code>	<code>Automatic</code>	tick marks

■ `array` must be a rectangular array of real numbers, representing z values.

■ `ContourGraphics[array, {{xmin, xmax}, {ymin, ymax}}]` can be used to specify x and y coordinates for axes.

■ `ContourGraphics` is generated by `ContourPlot` and `ListContourPlot`. ■ See page 134. ■ See also:

`ListContourPlot`, `DensityGraphics`.
