

■ 1.7.12 Mathematical Operations on Lists

Section 2.1 will discuss in detail how to do mathematical operations on lists. Here are a couple of cases that often occur in practice; Section 2.1 will give many generalizations.

<code>Apply[Plus, list]</code>	add up all the elements in <i>list</i>
<code>Apply[Times, list]</code>	multiply together all the elements in <i>list</i>

Simple mathematical operations on lists.

This adds all the elements in a list.

```
In[1]:= Apply[Plus, {a, b, c, d}]
```

```
Out[1]= a + b + c + d
```
