

■ 3.2.2 Numerical Functions

<code>Round[x]</code>	integer $\langle x \rangle$ closest to x
<code>Floor[x]</code>	greatest integer $\lfloor x \rfloor$ not larger than x
<code>Ceiling[x]</code>	least integer $\lceil x \rceil$ not smaller than x
<code>Sign[x]</code>	1 for $x > 0$, -1 for $x < 0$
<code>Abs[x]</code>	absolute value $ x $ of x
<code>Max[x₁, x₂, ...]</code> or <code>Max[{x₁, x₂, ...}, ...]</code> the maximum of $x_1, x_2, \dots$	
<code>Min[x₁, x₂, ...]</code> or <code>Min[{x₁, x₂, ...}, ...]</code> the minimum of $x_1, x_2, \dots$	

Some numerical functions of real variables.

x	<code>Round[x]</code>	<code>Floor[x]</code>	<code>Ceiling[x]</code>
2.4	2	2	3
2.5	2	2	3
2.6	3	2	3
-2.4	-2	-3	-2
-2.5	-2	-3	-2
-2.6	-3	-3	-2

Functions that convert to integers.

Web sample page from The *Mathematica* Book, First Edition, by Stephen Wolfram, published by Addison-Wesley Publishing Company (hardcover ISBN 0-201-19334-5; softcover ISBN 0-201-19330-2). $x + I y$	the complex number $x + iy$
$\text{Re}[z]$	the real part $\text{Re } z$
$\text{Im}[z]$	the imaginary part $\text{Im } z$
$\text{Conjugate}[z]$	the complex conjugate z^* or $\bar{z}$
$\text{Abs}[z]$	the absolute value $ z $
$\text{Arg}[z]$	the argument ϕ such that $z = z e^{i\phi}$

Numerical functions of complex variables.
