

■ Less

$x < y$ yields `True` if x is determined to be less than y .

$x_1 < x_2 < x_3$ yields `True` if the x_i form a strictly increasing sequence.

`Less` gives `True` or `False` when its arguments are real numbers. ■ `Less` does some simplification when its arguments are not numbers. ■ See page 72. ■ See also: `Greater`, `Positive`.
