

■ Off

`Off[symbol::tag]` switches off a message, so that it is no longer printed.

`Off[s]` switches off tracing messages associated with the symbol `s`.

`Off[m1, m2, ...]` switches off several messages.

`Off[]` switches off all tracing messages.

The *value* of `symbol::tag` is not affected by `Off`. ■ `Off[s]` is equivalent to `Off[s::trace]`. ■ `Off[]` is equivalent to `Off[s::trace]` for all symbols. ■ Switching off the printing of a message does not affect its detection by `Check`. ■ See pages 264 and 285. ■ See also: `Message`, `Check`.
