

■ BernoulliB

`BernoulliB[n]` gives the Bernoulli number B_n .

`BernoulliB[n, x]` gives the Bernoulli polynomial $B_n(x)$.

Mathematical function (see Section ??). ■ The Bernoulli polynomials satisfy the generating function relation

$\frac{te^{xt}}{e^t-1} = \sum_{n=0}^{\infty} B_n(x) \frac{t^n}{n!}$. ■ The Bernoulli numbers are given by $B_n = B_n(0)$. ■ See page 350. ■ See also: `NBernoulliB`
