

■ Round

`Round[x]` gives the integer closest to x .

Mathematical function (see Section ??). ■ Examples: `Round[2.4]` $\longrightarrow$ 2; `Round[2.6]` $\longrightarrow$ 3; `Round[-2.4]` $\longrightarrow$ -2; `Round[-2.6]` $\longrightarrow$ -3. ■ Round rounds numbers of the form $x.5$ towards 0. ■ See page 341. ■ See also: `Floor`, `Ceiling`, `Chop`.
