

■ ViewPoint

`ViewPoint` is an option for `Graphics3D` and `SurfaceGraphics` which gives the point in space from which the objects plotted are to be viewed.

`ViewPoint` $\rightarrow$ $\{x, y, z\}$ gives the position of the viewpoint relative to the center of the three-dimensional box that contains the object being plotted. The coordinates are scaled so that the longest side of the box has length 1. ■ Common settings for `ViewPoint` are:

$\{0, -2, 0\}$	directly in front
$\{0, -2, 2\}$	in front and up
$\{0, -2, -2\}$	in front and down
$\{-2, -2, 0\}$	left-hand corner
$\{2, -2, 0\}$	right-hand corner
$\{0, 0, 2\}$	directly above

- Choosing `ViewPoint` further away from the object reduces the distortion associated with perspective. ■ See page 123.
- See also: `Plot3Matrix`.
