

■ WeierstrassP

`WeierstrassP[u, g2, g3]` gives the Weierstrass elliptic function $\wp(u; g_2, g_3)$.

$\wp(u; g_2, g_3)$ gives the value of x for which $u = \int_{\infty}^x (4t^3 - g_2t - g_3)^{-\frac{1}{2}} dt$. ■ See page 374.
